

VARSHITHA THILAK KUMAR

AI/ML & Software Development Engineer

varshithathi006@gmail.com | +91 9360445442 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Amrita Vishwa Vidyapeetham – Ettimadai, Coimbatore	Aug 2023 – Present
B.Tech – Computer Science & Engineering (AI) CGPA: 8.6 / 10	
Velammal Vidyalaya – Chennai	Grade: 87.2 / 100 July 2023
Maharishi Vidya Mandir – Chennai	Grade: 93.6 / 100 July 2021

EXPERIENCE

Wezume – AI/ML Intern	Nov 2025 – Mar 2026
Remote, India	
- Developed and deployed a machine learning–based candidate analytics system that extracted vocal pitch and acoustic features from audio recordings to evaluate candidate–recruiter alignment. - Built end-to-end predictive scoring pipelines including audio preprocessing, feature extraction, model training, and REST API deployment into Wezume’s live hiring platform. - Automated candidate ranking workflows and improved recruitment decision efficiency through data-driven scoring mechanisms. - Collaborated on scalable backend integration and testing for production deployment.	

PROJECTS

Oil Spill Drift Forecasting GitHub	2026
- Designed a CNN–LSTM–Attention forecasting system to predict oil spill movement using multi-source satellite and oceanographic datasets including SAR imagery, ocean currents, wind fields, and bathymetry. - Developed preprocessing, training, evaluation, and visualization pipelines for spatio-temporal predictive analytics and automated experimentation workflows.	
Battery Data Extraction – LLM + XAI Pipeline GitHub	2025
- Engineered a document analytics pipeline using Python and LLM-based extraction techniques to retrieve battery-performance metrics from unstructured scientific literature. - Developed analytical dashboards with explainability features, visualization tools, and automated CSV reporting for extracted battery datasets.	
Movie Inferno – AI Recommendation Platform GitHub	2025
Developed a full-stack recommendation platform with backend APIs, real-time database synchronization, and cloud deployment workflows.	

SKILLS

Language	Python,C, C++, SQL
ML / DL	PyTorch, TensorFlow, Scikit-learn, OpenCV, Hugging Face Transformers
Data science	RAG, Pandas, NumPy, Data Visualization, Predictive Analytics
Deployment	REST APIs, Docker, Vercel,Firestore, Supabase, Streamlit

ACHIEVEMENTS & CERTIFICATIONS

- IEEE Conference Paper – ETIS 2024 (Trivandrum): Time-Frequency Analysis of Power Quality Disturbances, published on IEEE Xplore |Automated Battery Materials Data Extraction from Scientific Literature using LLMs and XAI (Reccap-2026 IIT Palakkad)
- Finalist in national-level software engineering and AI innovation hackathons : GenAI Hackathon- Value Health Org (2024) | Cubicle Code 5.0 Hackathon (2025) at Microsoft ,Bangalore |HackBLR (2026)
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate | Multimodal RAG (GenAI Academy) | Full-Stack MERN (IITM Research Park)
